

# Sewing a Standard Hem (Double Fold)

**1.** Use the 10mm hemming guide above.

**2.** Insert the screw at the back of the guide into the hole and slide upwards

**3.** Once it's in place you're now ready to start sewing.

**4.** Insert the material going from left to right into the hem guide. Push the material until it starts to curl around the guide.

**5.** Continue to curl the material as it goes through; this will help to make the hem.

Revision #10
