Assets - Imagery

Our marketing assets have been created using a number of pieces of software as the originator, Richard McCombe, has limited skills with Adobe Suite.

Much of the artwork is originated in CorelDraw and then imported into layers in Fireworks and exported in different sizes and formats for email and social media.

Some of these assets make their way into printed matter, so the original file format is either vector or high-resolution bitmap and scaled down for digital.

Not just a flag but your own personal flag. With the help of our portable flags you can quickly, easily, and affordably make your own full-colour printed portable flag in just a few seconds. This is because all you need to do is five steps — choose your shape, size, fabric, sides, and hardware — and we'll take care of the rest! Available in [Read More](#)

Our flag and textile printing service uses a number of technologies. For large backdrops and table clothes we use a crease-resistant 220gsm. It provides 70% opacity and is designed for tension frame systems, banners and tablecloths. It is printed with UV cured inks and offers excellent stretch and recovery with bold colour reproduction.
