

# SIP Phone

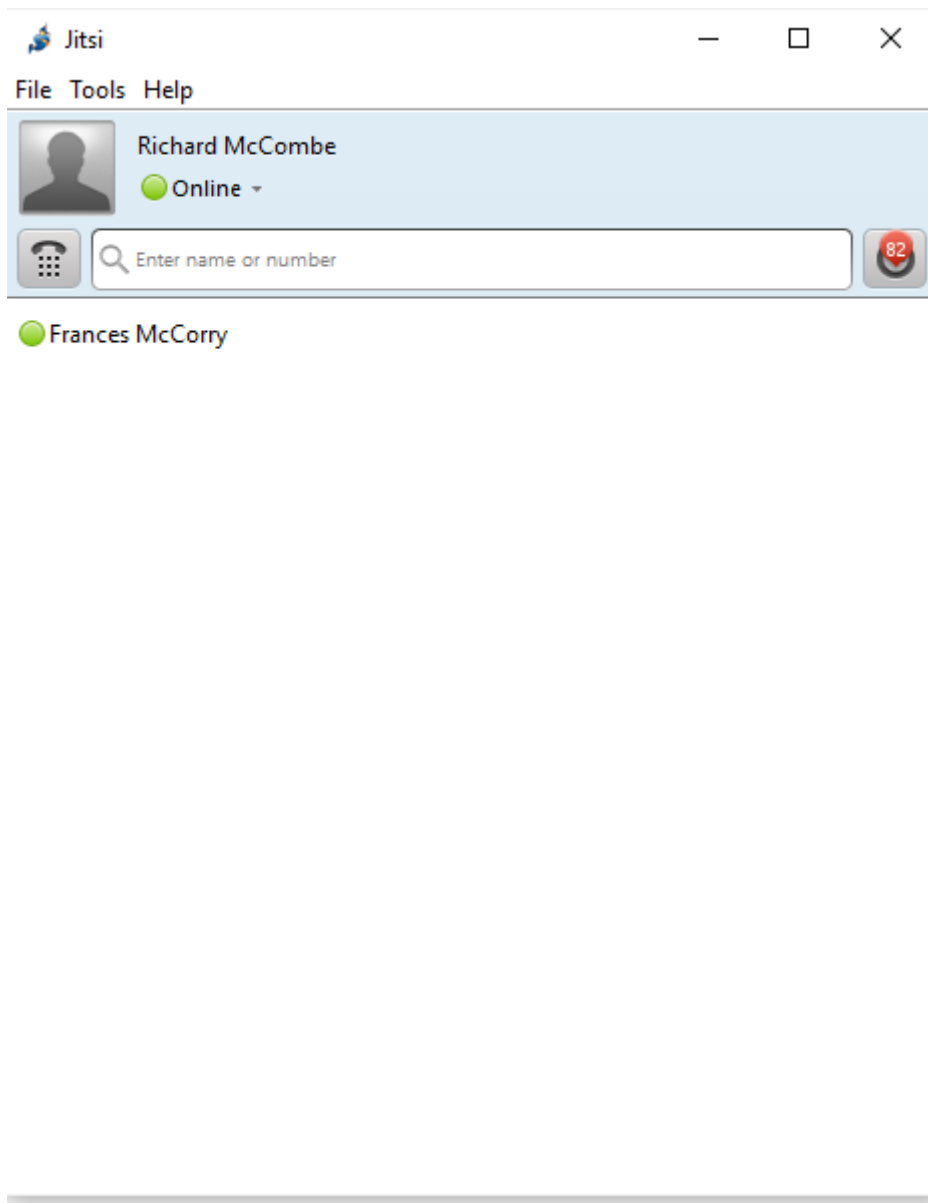

How to download and install Jitsi, a free SIP phone for VOIP calls.

- [Jitsi - Download, Setup and Dialling](#)

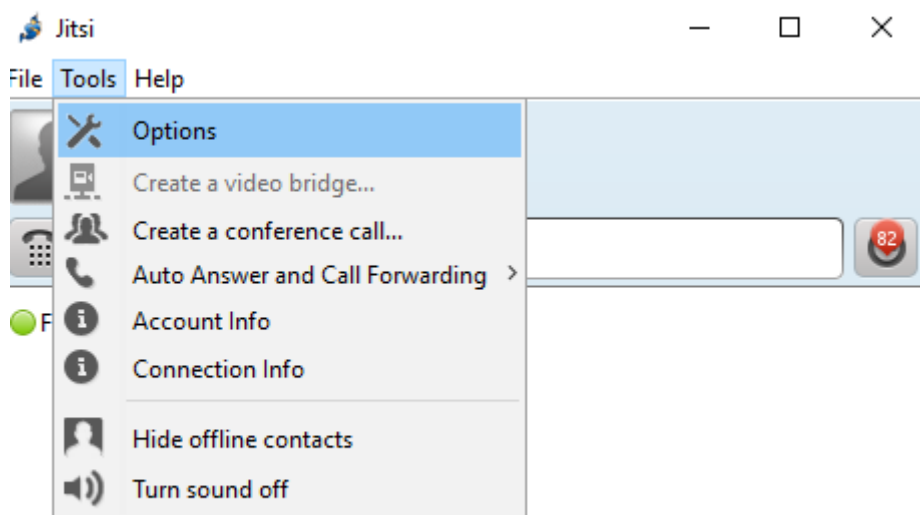

# Jitsi - Download, Setup and Dialling

<https://jitsi.org/>

1. Go to <https://jitsi.org/>
2. Download the software, there may be a security warning. Agree.
3. Follow the instructions to install the software.
4. Open the software, Jitsi from the Windows Start Menu
5. You will see something like this:

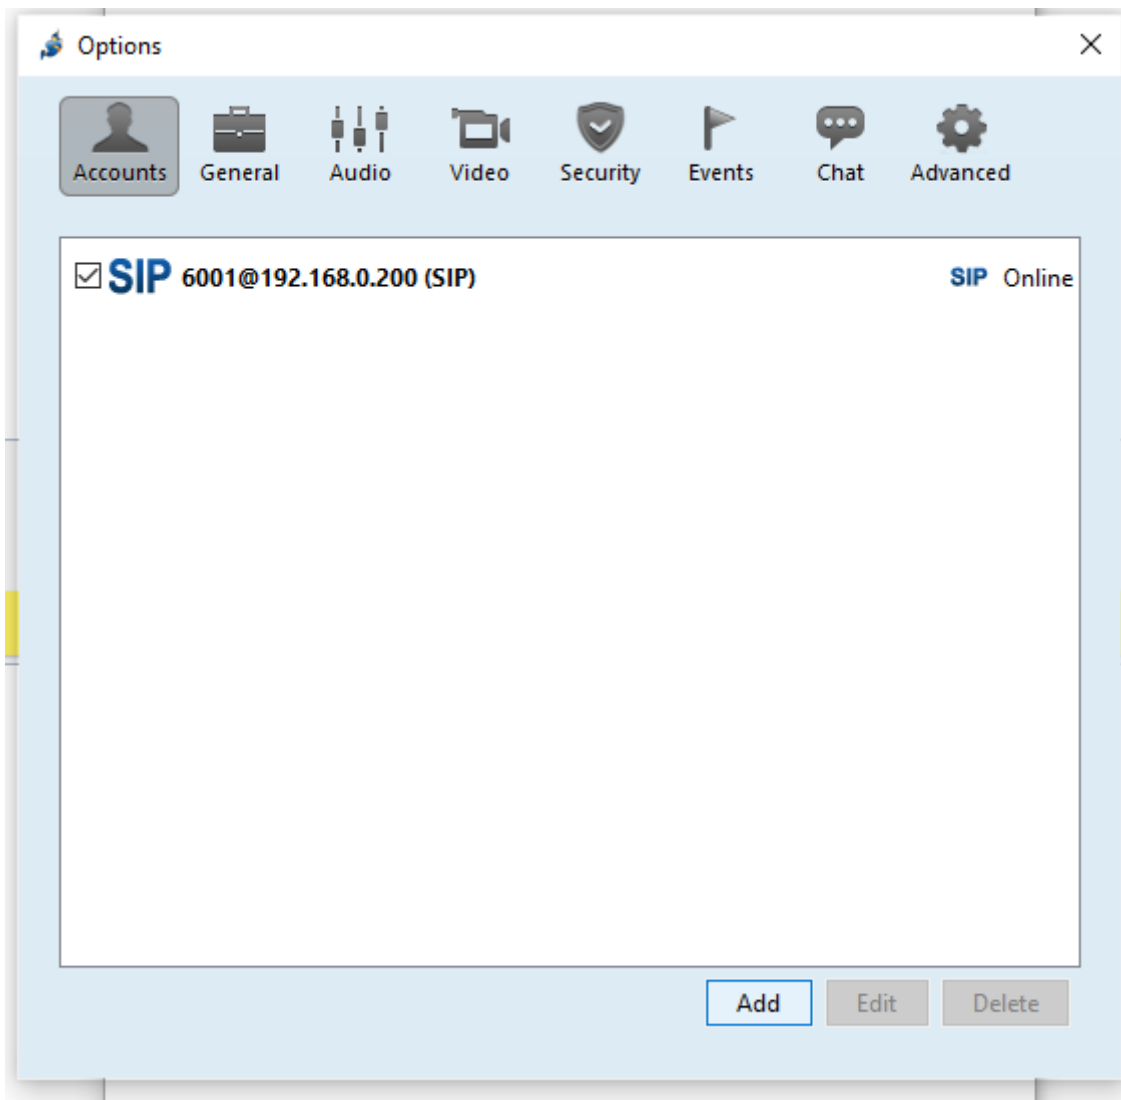

6. Go to Tools / Options

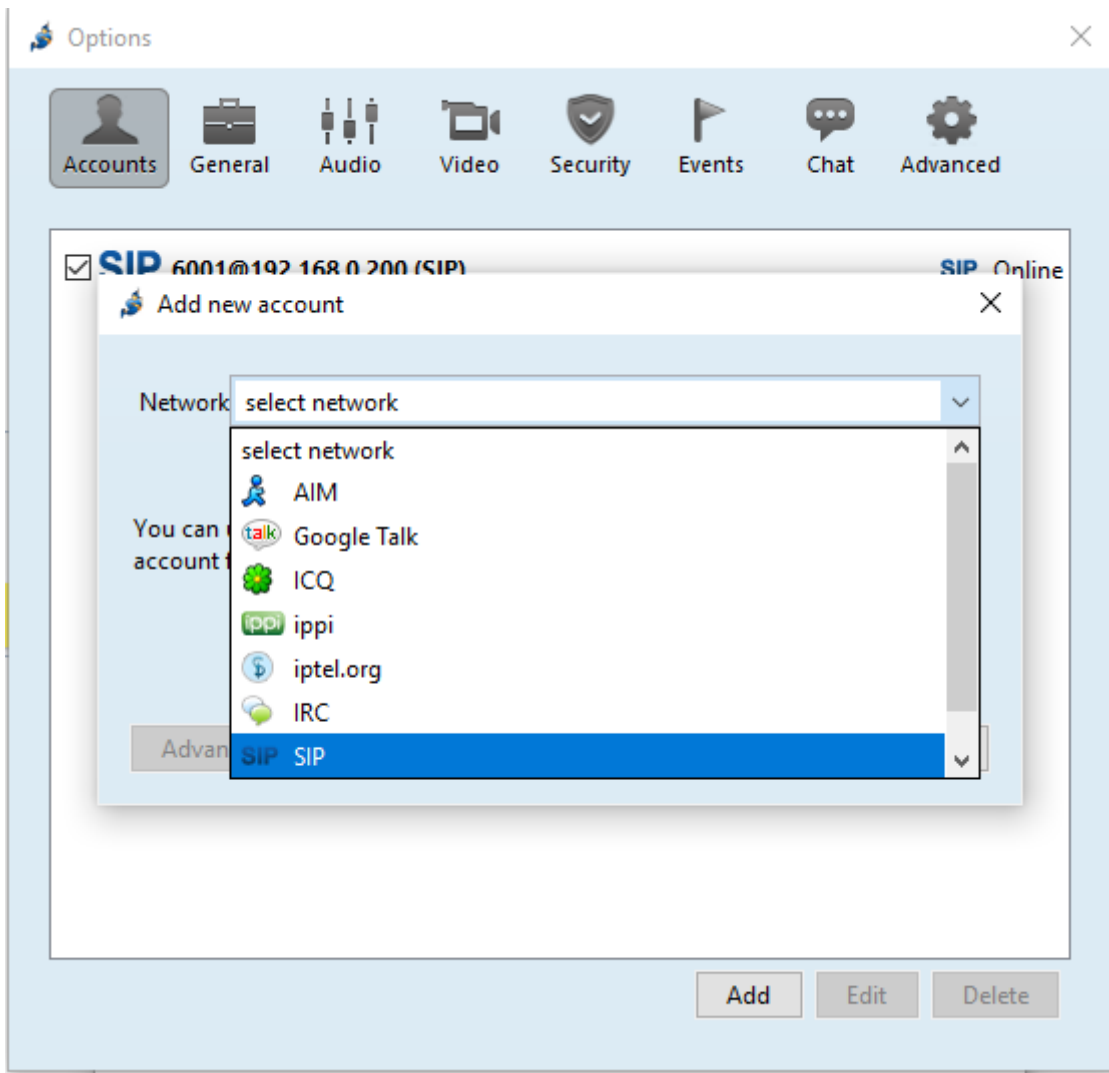

---

7. Click "Add"

8. Select "SIP" from the Network dropdown:

9. Press "Advance". Add the SIP ID (this is the extension number followed by the IP Address @192.168.0.200) and the Password, you will be able to get this from Richard or Robert. Now add your name that will be displayed when you make a call internally.

Account Registration Wizard

**SIP**

Account Connection Security Presence Encodings

User name and password

SIP id   
Ex: john@voipphone.net or simply "john" for no server
