SIP Phone
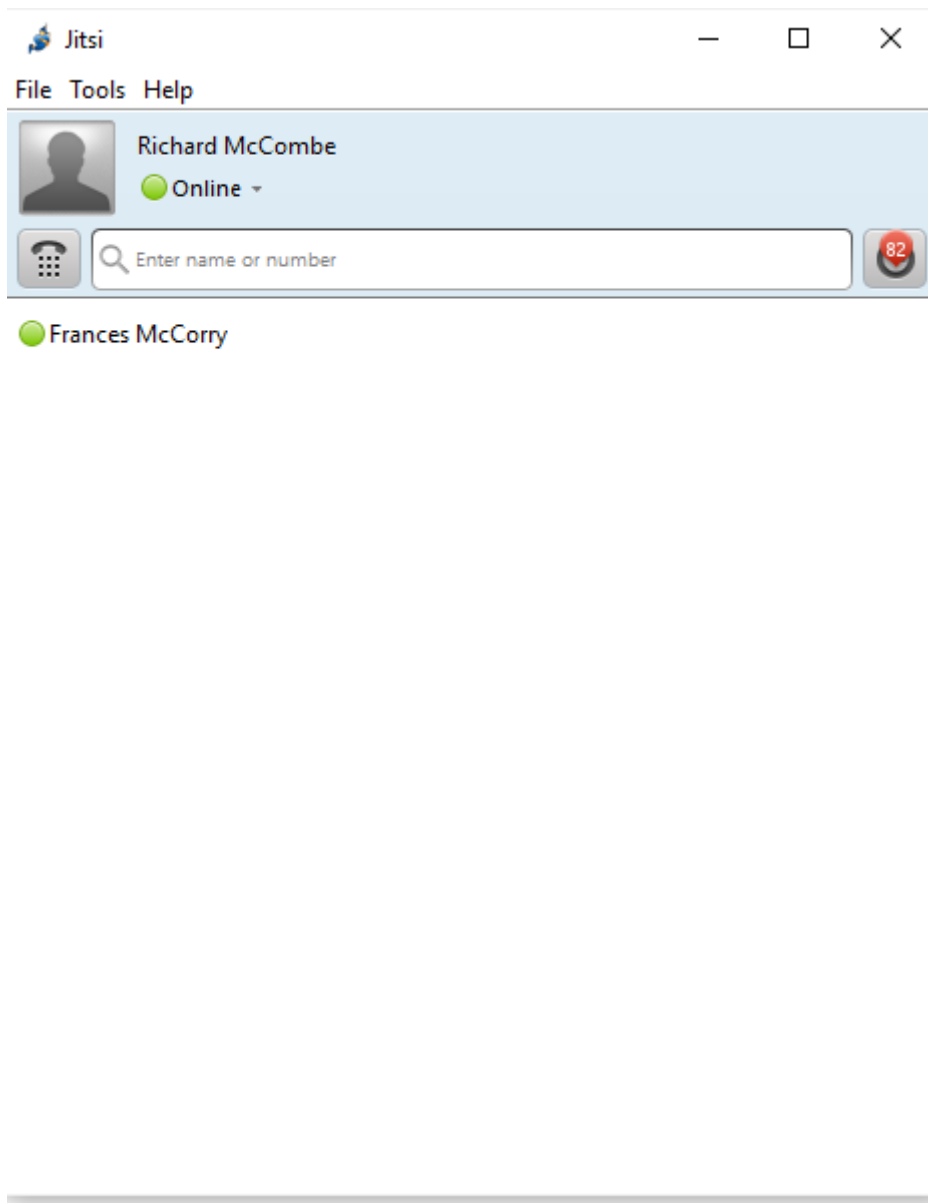

How to download and install Jitsu, a free SIP phone for VOIP calls.

- Jitsi - Download, Setup and Dialling

# Jitsi - Download, Setup and Dialling
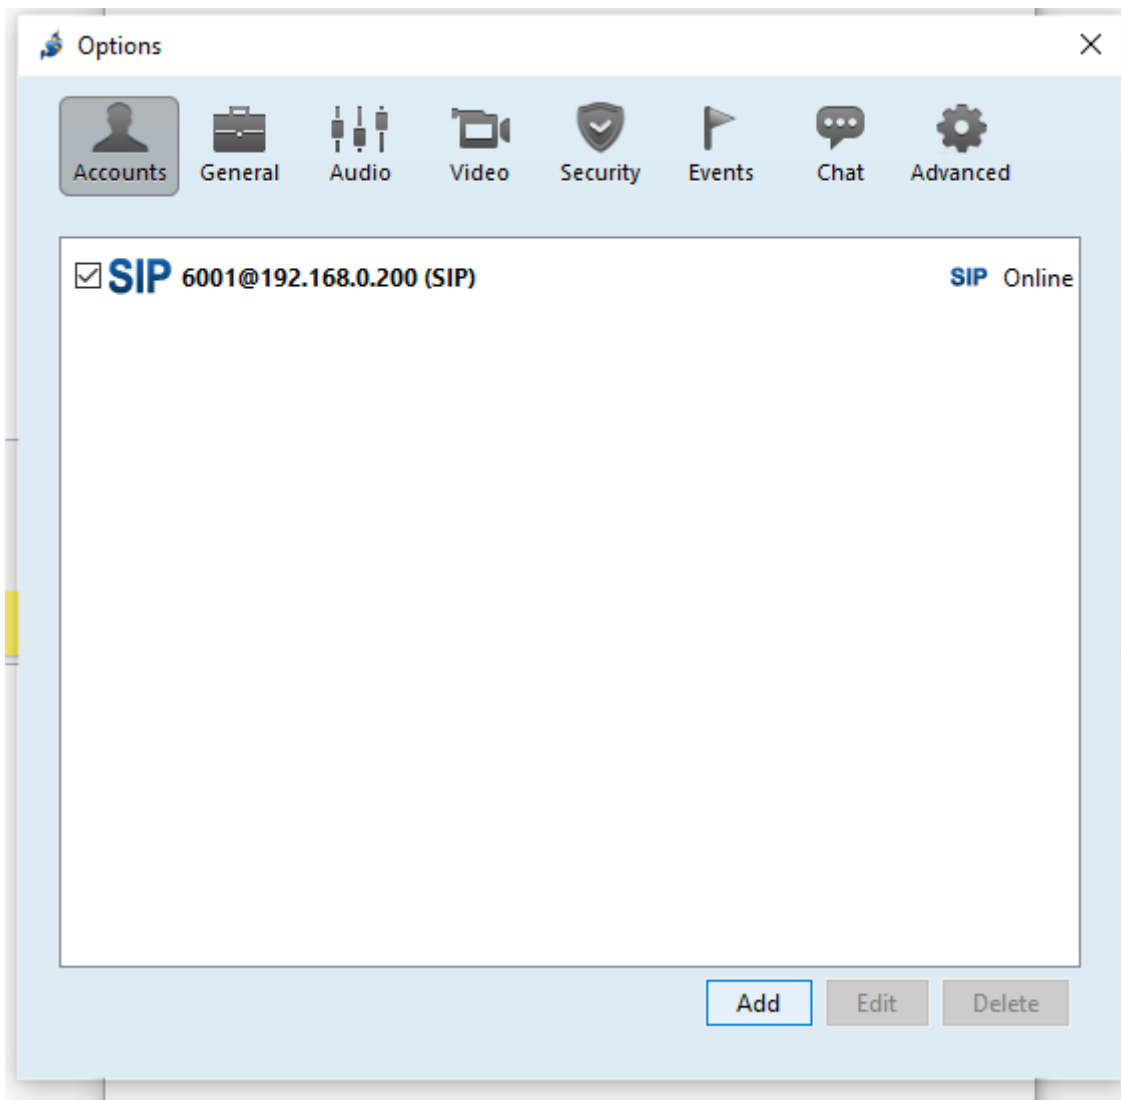

https://jitsi.org/

1. Go to https://jitsi.org/

2. Download the software, there may be a security warning. Agree.

3. Follow the instructions to install the software.

4. Open the software, Jitsi from the Windows Start Menu

5. You will see something like this:

6. Go to Tools / Options

7. Click "Add"

8. Select "SIP" from the Network dropdown:

9. Press "Advance". Add the SIP ID (this is the extension number followed by the IP Address @192.168.0.200) and the Password, you will be able to get this from Richard or Robert. Now add your name that will be displayed when you make a call internally.
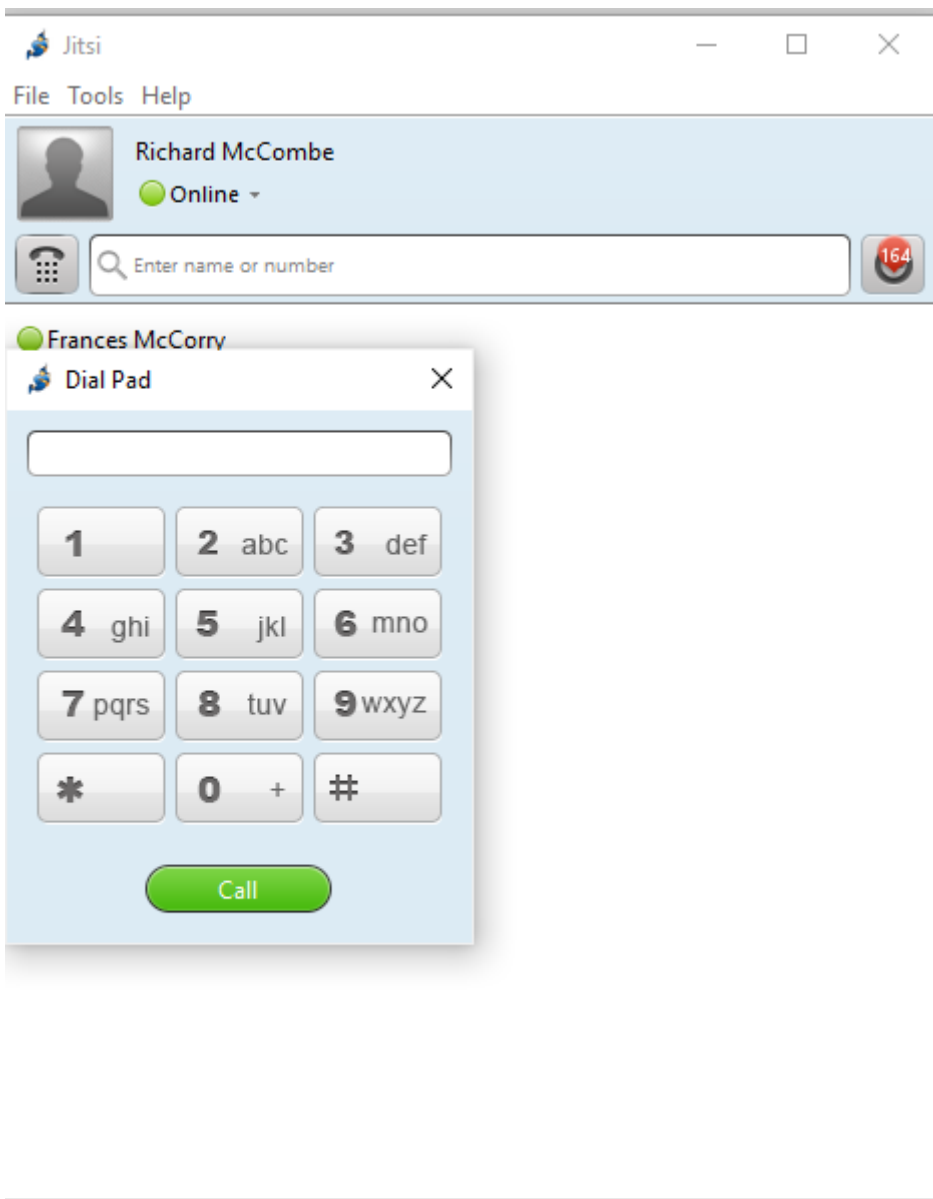

10. Click "Next".

11. You will be asked to connect which will test your connection to the server.

12. You are now able to make a call like this:

13. Click the Phone Icon/Button

14. Dial the number (9 for an outside line) and press the call button.
